DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record is seen to disclose or suggest the limitation of claim 1 that a first flange comprising a block portion having a second edge defining a passage extending through said block portion and a mounting portion extending radially from said block portion, said mounting portion having an outwardly facing surface with a groove formed therein, said first flange being positioned in said opening with a peripheral edge of said mounting portion secured to said first edge; a cap having a sealing rib and a connector flange extending from said cap and wherein said connector flange is removably connected to said mounting portion such that said sealing rib engages said groove. For example, the closest reference found, Caparros, teaches a cap that is attached to a container but does not teach [a first flange comprising a block portion having a second edge defining a passage extending through said block portion and a mounting portion extending radially from said block portion, said mounting portion having an outwardly facing surface with a groove formed therein, said first flange being positioned in said opening with a peripheral edge of said mounting portion secured to said first edge; a cap having a sealing rib and a connector flange extending from said cap and wherein said connector flange is removably connected to said mounting portion such that said sealing rib engages said groove.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
